ASHBORE.—The *Kingston News* of the 1st day, says:—The Steamer *Corvian* left the harbor yesterday on her trip up the lake, such was the state of the sea that she had to run into South Bay for shelter, attempting to get out the next morning about 4 o'clock she ran aground on Bay Point, where she now lies with 10 feet of water in her hold. Her passengers were taken off by the steamer *Algerian*, which was on her way up. The pursuer of *Corvian* came down on the *Magnet* for

Daily Intelligencer.

FRIDAY, NOVEMBER 5, 1875.

Town and Vicinity.

THE GRAIN MARKET.—Receipts today
were light and prices lower. No. 1 barely
selling in the early part of the day at 75c
to 78c.

THE MARKET.—There was a slight stimu-
lation on the market this morning, the
weather being so cold and threatening as
to cause farmers to remain at home.

ARRIVED.—The steamship *Phonix* arrived
at Pier Point from Glasgow at 11:45
p. m. yesterday, with 5 cabin and 10
steerage passengers.

THE FISHERIES.—The bay fishermen re-
ported last night's fishing as amongst the
best of the season, the take of herring hav-
ing been exceptionally large.

VITAL STATISTICS.—The births, deaths
and marriages registered in Belleville dur-
ing the month of October were as follows:
Births, 4; marriages, 15; deaths, 5.

SHIPPING OF CATTLE.—A number of
cattle having been imported by American buyers at
the Market Bay, were here today for shipment
to Oswego per steamer *Kinross*.

GOT OFF.—The schooner *David Andrew* has
been hailed off by the tug *Chatham* and
steamer *St. John* and the steam large *Ten-
ney*, after several days' hard work.

LAST TRIP.—The steamer *Albion* is
to make her last trip to Montreal on
Thursday, 11th. The *Piston* will make a trip in
the following week, leaving here on the 15th.

LEND TOO.—The concert given last
night by this wonderfully gifted youth last
night was very successful in an artistic
sense, his playing being, as before, highly
appreciated.

OS FUEL.—The smoke stacks at Flint
& Holman's saw and planing mills burned
last night, but no damage was done.
An alarm was sounded from the mill bell,
but it did not become general.

ICE.—Last night's frost caused the for-
mation of a good deal of ice in the still
water inside the island. This morning's
sun caused a good deal of it to vanish,
however.

THE EPIDEMIC.—A farmer who had
several horses afflicted with the prevailing
disease, says that after repeated experi-
ments he finds nothing to equal feeding
these western corn fodder—the corn, the
stalks and all.

THE CELLS.—There were not many
transfers in the cells last night. A poor
woman named Gold and her two children,
who have been sheltered in the Station
since Monday, were forwarded to the place
to which they wished to go, Mrs. Oakley,
who was taken there, to avoid feeling
the way for being drunk and disorderly,
sent, at her own request, by the *Union*
this morning to Pictou.

THE SCHOONER *Oliver Mow* is
still grounded at the lower elevator. It
is badly in the way, as the elevator is full
and Company are driven to the expense of
loading the *Phonix* over the dock. It is
the *F. Hall*, laden with coal and pig iron,
is aground near the same place. She also
was relieved of her load.

NEW MARINE WORKS.—It will be seen
by advertisement that Mr. J. T. Lattin
has opened a new marine cutting establish-
ment on Hamilton Street, opposite the Grand
Junction Station. Having secured the
services of a first-class marine cutter, he
is now ready to receive orders for
repairs, alterations, repairs, places and
moulds of all kinds.

RECAPTURED.—John McGowan, who
escaped from Belleville got on Saturday,
October 24th, was recaptured at Montreal
yesterday afternoon, Nov. 4th, by two
detectives from Trenton, named
Faller and Polle. McGowan will, owing
to this escapade, be apt to have his motions
carefully watched hereafter, and much
difficulty will be given him for escape. The Deputy
Sheriff or a constable will proceed to
Montreal to-morrow morning to secure the
prisoner.

WINDOW BREAKING.—There seems to be
a perfect mania amongst the boys of the
town for window breaking, which is car-
ried on to such an extent that so soon as a
house becomes vacant all the window glass
is smashed, and even new buildings, which
have not been tenanted, suffer in the same
way. The police cannot be too active in
suppressing this evil, which has grown
into proportions, owing to the immunity
from punishment which the window
smashers have enjoyed. Let them be
watched and brought to book by all means.
One example has recently been made;
a few others will put off the nuisance.

THE "OSWEGO BELLE".

The St. Catharines Daily News of the 2nd

gives the following account of the launch
of a new steamer, which is hereafter to be
the most famous launch in Kingston and
Belleville.
"Yesterday a few minutes after 4 p. m.,
the handsome steamer 'Oswego Belle' glid-
ed gracefully from its place into the canal
at Kingston's wharves. The launch was the
most successful launch and the economies of
the operators were lavished on the gracefully
modelled boat. As we went off, Miss Simp-
son broke the bottle waving in flowers, and
this was the christening.

"The 'Oswego Belle' is a full-sized canal
vessel, 100 feet long, 26 ft 3 in. beam, and
9 feet depth of hold. As she went off, gaily
adorned with bunting she presented a fine
appearance, having at her bow the British
flag, in the center the Stars and Stripes, and
at the stern the flag of Canada, while
smaller streamers with Oswego, Belleville,
Millarston, Kingston, Niagara and Pictou con-
stituted the rest of her main and ensigns.
She is fitted up in the most gorgeous style and
will be a favorite passenger boat, and with
such a live man as Captain Moulton to run her
the mate and wheelman's name is the
company. She is fitted up with many im-
provements and conveniences for comfort. Her
engineers' rooms are below, and in rear of the
engine; the mate and wheelman's rooms are
on the hurricane deck near the wheel-house.
The forward end of the saloon contains a
great deal more room than usual, and can, by
folding down, be made a supper room. The
state-rooms are large and some of them com-
municate by an inner door with each other,
thus serving better for family parties. The
strong hold, the mate and wheelman's rooms
on the hurricane deck near the wheel-house.

"The engine is double cylinder, con-
nected to one bed plate and one shaft, with
cranks at right angles; cylinders 24 inches in
diameter and 21 inches stroke. Attached to
the main shaft are two pumps on each side
of the boiler, 2 inches in diameter by 10 feet
long. The boilers are placed fore and aft
with furnaces facing each other and 8 feet
apart. Both boilers being connected by
strong boiler plate bricings and iron
shafts, and which forms a smoke box, the top
of which receives smoke stacks, being
fitted and arranged so that one can be worked
independently of the other.

Daily Intelligence.

MONDAY, NOVEMBER 8, 1875.

Town and Vicinity.

HAMILTON'S THE TOWN.—We understand that judgment was given in this case this morning in favor of the Corporation.

PRAYER MEETING.—The monthly prayer meeting of the Evangelical Alliance will be held this evening in the lecture room of the Bridge Street Methodist Church.

SHIPPING.—There is more shipping business doing now than for some weeks past. Two schooners are unloading coal, and several other vessels are taking on grain.

THE MISSISSIPPI.—At the Perth Amboy on Thursday it was decided that the Mississippi is a free stream and that Messrs. Back and Stewart had a right of way and could remove all obstructions placed in the way of a free passage. This decision is important to our lumbermen.

A GOOD DOG.—A farmer who lives in Tyndal has a black-and-tan hound of medium size, over which, he informs us, more than one hundred dollars have been killed since last season. The dog is in fine trim, and has cleared the woods near his owner's dwelling pretty well, but there are still a few left there.

QUICKEST TRIP.—The number of "quick-trip" on record is multiplying so fast that it will soon require the services of a statistician to keep record of them. The latest is from the *Quebec Times* of the "The schooner *Capitan*, Captain Savage, left this port at 11 A. M. yesterday, went to Wellington, loaded with barley, and arrived back here at 12 o'clock last night."

BARN BURNED.—On Friday evening, Nov. 6th, the barn of Mr. Holden Reed, lot 7, in the 5th con. of Rawdon, was burned together with all contents, consisting of a reaping machine, two fanning mills, ploughs, drags, grain, hay, &c. A large portion of the grain was saved in a damaged state. Mr. Reed's loss amounts to over \$1,000; insured in the London Mutual Agricultural Insurance Association for \$600.

THEY FEEL AND FARM.—We are in receipt of this excellent sporting weekly, which is published in New York at \$3 per annum, and which can be obtained from the newsmen at 10c per copy. The *Turf* is edited by Col. S. D. Bruce, a celebrated sporting authority, associated with whom are several other able writers, and contains a very large amount of interesting reading matter. We recommend it to sportsmen who wish to keep posted in matters pertaining to the turf, field sports, hunting, yachting, &c.

POSTAL.—Senders of newspapers by post to the United Kingdom should bear in mind that the new postal law, which came into operation on the 1st of October last, does not affect the rate of postage of 2c. per copy, which must in every case be fully prepaid by stamps to secure their transmission. The Post Office recently sent to the *Daily* Editor a large number of newspapers for the United Kingdom, wrongly prepaid for at the rate of 1c. per copy, as if intended for Canada or the United States; therefore the senders should not be surprised to find that they have not reached their destination.

DUCK SHOOTING.—The "fall ducks" are numerous this season, and a good many large bags have been made within a few days past. Owing to the approaching close of the season, however, and the large amount of shooting that is in this section, the birds are becoming very wild and do not decoy as well as they did a few days ago, although they are still plentiful. It is disastrous that Sunday shooting should be carried on to the extent that it is in this section. Reports of game from the Prince Edward shooting grounds were frequent yesterday, and some were seen on this side of the lake with dogs and guns in pursuit of game. The desecration of the Sabbath ought to stop to put a stop to it, which can be easily done if it were made by the courts who ought to take an interest in the matter.

BACK AGAIN.—John McGowan, the gambler, is back to his old quarters in the Belleville jail, where he is likely to remain until his term of imprisonment has expired. Yesterday of the town police, Captain Meyer went to Millbrook by the morning train on Saturday, received there the man from whom he had in charge, and reached here on his return by the "local" train on Saturday night. The prisoner had been in Millbrook for about a week previous to his arrest, working about a tavern for his board. He wore the prison trousers and overalls over the same as when leaving jail. On his way here he was quite communicative, and stated that after getting clear of the goods here he made a bee-line for the woods, where he remained for about two days. Thence he made his effort to be made by the train, where he crossed the Trent, and

after having dug a tunnel out of his paper-lined head, he was engaged to fight with a fall-work about which he knew nothing—he wended his way to Millbrook, getting his goods from the charitable farmer along the road. McGowan will engage to do no more breaking for five years at least, and will pass "the holidays" in his present place of abode, unless he proves clever enough to outwit his captors again.

THE GRAIN MARKET.—There was less business than usual done on the market today, receipts being light. Prices of barley ranged as follows: No. 1, 75c; No. 2, 60c; No. 3, 55c.

ADMITTED TO LAKE.—On Saturday Mr. Sanger Golding, who had been arrested, charged with the killing of Peter Martin in Golding on Tuesday, Nov. 2nd, was taken before the County Judge and admitted to bail, himself in \$1,000 and two sureties in \$500 each.

CAMBERG'S ELEVATOR.—Messrs. W. H. Campbell & Co. had a gang of men at work on the elevator, which was being put on the river, which is running out on the road in front of the building. About 1,200 bushels will be shipped on the steam barge *Norfolk*. The full extent of the damage has not been ascertained, but it is not more serious than anticipated.

GOOD NEWS.—As has been the case on the occurrence of each of the important election cases which have lately taken place, the telegraph officers were on Saturday night crowded with persons anxious to learn the results of the polling day in West Toronto. It has become, owing to the local assertions of the Grit party that their candidate would be elected by a large majority, a settled conviction in the minds of many that Mr. Turner would be successful. It was, however, a pleasant surprise to the Conservatives who so thought, when the news was flashed over the wires, at about 6:30, that Mr. Robinson had a majority of 285 with four polls to be held. This ensured the success of Mr. Robinson; and a few Grits, having against hope, hung about the offices until the final result was announced as a majority of 346 for the Conservative candidate. They then were sorrowfully departed, and the Conservatives felt correspondingly jubilant.

GOOD ADVICE.—There are few people who understand the art of advertising. The few who understand it invariably succeed and amass fortunes. There is not a single exception to this rule. The law of advertising, clearly understood and obeyed, enables the advertiser to realize the boundless truth there is in one of the proverbs, "There is a time for everything, and he who understands the law of advertising, or fails to give obedience to it, will surely realize the other half of the same proverb: "There is a time for everything, and he who does not, but it tends to poverty." Advertising, to be successful, should not be spasmodic and intermittent, but continuous. Perseverance, it always returns rewards. There is no such word as fail to the persistent advertiser. And he who expects results from a single advertisement, which had but two or three insertions and then withdrawn, is no more reasonable than a man would be to expect favorable results from a single shutter down three days in a month, keeping the shutter closed the remainder of the time; or than the man who should have signs of business except on particular days and long intervals of time.

Police Court.
 (Before A. D'AMICO, Esq., P. M.)
 Monday, Nov. 8.
 John Fraser was charged with stealing on November 1st, 1875, a few sheep skins, the property of James Slavin. The prisoner pleaded "not guilty," and elected to be tried summarily. Mr. W. J. Diamond for the defence. George Henderson for the prosecution. The prisoner was charged with selling sheep skins to Mr. Slavin, in Canton, about a year ago. Slavin came on the same day and claimed five skins, which he picked out from among a number of others, identifying them by a small black mark on the head; could not say that the skins which Slavin took were those which prisoner sold. George Henderson then asked the witness, if he knew Slavin mentioned before picking them out. At this stage the case was adjourned till Wednesday, the prosecutor being absent.

Charles Drysdale, an old offender, was charged with stealing a basket containing cotton and dress materials from Henry Knapp. Prisoner elected to be tried summarily, pleading "not guilty," and saying that the affair of the basket was a matter of some time, and that he had been working for Knapp, and that he had been working about Mot's tavern, where the basket was left for a short time, and that he made up with the cotton as they were laid by down street by Mr. Knapp and caught with the cotton under his arm, upon refusing to give up the cotton he was given. Prisoner was found guilty, and was sent to jail for a month with hard labor.

Matthew Ferguson was charged with stealing his wife. Withdrawn on payment of costs.

There was a frog who lived in a pond. He caught a cold that he could not "cure." He went to a doctor, and the doctor said, "You must let him live." COMING TO PARTICULARS.

ASTOUNDING CHARGE.

The West Durham News, the journal

that first brought to light Mr. Brown's "Big

Push" letter, has repeatedly told readers

that it had no intention to expose, and

challenged an investigation.

The paper had not been taken

on by the parties charged, the News

repeating its innuendo week after

week, until the charge on the 12th

of last week.

The charge is so pointed and specific,

that no excuse can now be put forward

for the article to the test. Let us have

no more shuffling about vague charges.

Mr. Simpson should be compelled to

show the world the paper in his

hand. If he does not, he must be

purchased, or punish the man who accuses

him. After what has already come to light,

we shall not be surprised at anything which

the Hon. John may see fit to do.

The Hon. John is the standard of

public morality." The following is the

News, charge:

"Since we make our charges against Mr.

Macdonald, we have been told by the

Hon. John Macdonald's government, that

several organs of the government have

been deceived by a great deal of lies. There

is nearly a vile or offensive paper, that in

their conduct they have not been able to

show the world the paper in his

hand. If he does not, he must be

purchased, or punish the man who accuses

him. After what has already come to light,

we shall not be surprised at anything which

the Hon. John may see fit to do.

SATURDAY, NOVEMBER 13, 1875.

Town and Vicinity.

Look out for the Christmas visitor.

GRAIN MARKET.—The market continues steadily unchanged rates.

SERIAL MEETING.—A special meeting of the O. L. N. No. 727 is to be held in the Orange Hall on Monday evening at 7.30.

TOWN COUNCIL.—A regular meeting of the Council will be held on Monday night at the usual hour.

The Christmas visitor is coming.

COUNTY COUNCIL.—This body will hold its next sitting during the coming week, commencing on Thursday next at 2 o'clock p.m.

PERSONAL.—Welcome that Prof. Macoun, who has completed the botanical survey in the North West, will reach home by the express from the west to-night.

What is the Christmas visitors.

A QUIN NIGHT.—Last night was a night of rest for the police, there being no disturbances on the streets, consequently no arrests and no prisoners in the cells this morning.

THE EPIDEMIC.—The horse disease is now a thing of the past, it being notable that not one horse in ten is now coughing, whereas a fortnight ago it was quite the reverse.

PRIVATE BILLS.—Notice is given that Tuesday, the fourteenth of December, will be the last day for receiving petitions for Private Bills to be passed by the Legislature of Ontario.

Coming! Coming! Coming! Who?—The Christmas visitor.

A COUNTRY.—A man named Owen O'Rourke fell from a ladder in Chicago, and the ladder fell on his head, and he was severely wounded upon his head, which struck an iron bar in his descent.

WINTER QUARTERS.—The *Picton Gazette* says: "We understand the steamer *Picton* will winter in Montreal this season, for the purpose of being hauled out in dry dock, and having her hull thoroughly renovated."

It is a spirit or human form? The Christmas visitor.

"FARMER'S ALMANAC."—Josh Billings' annual, bearing the above title, is as amusing and interesting as usual. It is published by Messrs. Belford Bros., Toronto, and is sold by book-sellers at 15 cents per copy.

OBSTRUCTING THE SIDEWALKS.—Some of our merchants are drifting back into the old habit of obstructing the sidewalks with their goods. The police ought to put a stop to this practice ere it become general again.

Further notice in due time of the grand reception to be given our distinguished Christmas visitor.

BANK ACCOMMODATION.—It seems that our merchants and traders do not consider the present bank accommodation in town sufficient for the requirements of business, as a petition for the establishment here of a branch of the Federal Bank is in circulation among business men and is being largely signed.

THE MARKET.—There was this morning a very large number of sellers, the square being crowded with farmer's wagons, and purchasers were numerous, as usual. The old nuisance of auctioneers selling on the north side of the market building was rife, and these fellows having words about them, whose presence caused people to take a mud path in the middle of the road. It is time the Council put a stop to this, or remove the sellers to some other part of the square.

LAYING THE GROUND STONE.—On Wednesday next at noon, the corner stone of the M. E. Tabernacle in Belleville will be laid with Masonic honors. Subsequent to the ceremony, a meeting will be held in the Town Hall, at which address will be delivered by several prominent gentlemen. At 2 p.m. dinner will be served in the ball room. In the evening a special Convention of the University will be held, at which the Rev. Dr. James, President, will be very interesting, and we trust to see a large attendance.

BELLEVILLE AT THE CENTENAL.—The meeting last night, to arrange for the representation of Belleville and Hastings at the Centennial, though not largely attended, and though most of our principal manufacturers were conspicuous by their absence, yet, we have good reason to hope, result in securing a fair representation of the manufacturing of our town and of the country at large next year. The information given by Messrs. McDougall and Fraser was of a highly interesting character, and

MONDAY, NOVEMBER 15, 1875.

Town and Vicinity.

Look out for the Christmas visitor.

TOWN COUNCIL.—The Council will hold a regular fortnightly meeting this evening.

GRAIN MARKET.—No change whatever today. Receipts the lightest of the season.

HUNTING.—Those of the hunters in this district who have returned from their fall hunt report far more plentiful than for years past.

The Christmas visitor is coming.

SILENT.—The town clock was silent yesterday and to-day, the striking apparatus being disarranged in some manner. The familiar noise of the great bell which marks the passage of the hours was much missed.

SCHOOL CENSUS.—Mr. E. C. Flint, who has been appointed to take the school census of the town, is making thorough preparation for the work, which he will conduct on Monday, the 22nd inst., completing within the time limited by the statute.

Coming! Coming! Coming! Who?

The Christmas Visitor.

ENLARGED.—The Peterborough Times has been enlarged by the lengthening of its columns, and in addition has been improved in its general make up. The Times is a good local paper, and furnishes excellent value to its readers for the amount of subscription, which is only one \$1.

No PRISONERS.—The habitual drunkards of the town are evidently on their best behavior at present, as there has been no arrests of late for very infrequent Saturday night and that of Sunday passed off without any arrests being made. Last night the cells were well filled, but with voluntary inmates only, whom the storm had driven to shelter there, instead of in their usual haunts.

PERSONAL.—Prof. Macoun has reached after a long absence in the North-West home Territory, where he has been making a botanical survey on behalf of the Government. We learn that the Professor has made a thorough survey of the Peace River country, with which tract he is very much pleased. His many friends will learn with pleasure of Mr. Macoun's safe return, and will look with interest for some account of his journeyings.

What is the Christmas visitor.

THE BRUSH FACTORY.—A good deal of energy has been displayed by the gentlemen who have undertaken to go into the brush manufacturing business here. Their large building on the site of Pease's old factory, which was burned during the present year, is up, and completed, or nearly so, and ere long the machinery will be put in and work begun. It will be an important addition to the manufactures of the town, as a considerable number of people will be employed in the factory.

Is it a spirit or human form? The Christmas visitor.

CHURCHMAN.—The Cobourg Sentinel says that the Waverley Club, of that town, an old opponent of the Belleville Club, has purchased a vacant lot where it is intended to construct a covered rink, large enough for two rinks to play at once. This will be comfortably fitted and lighted. We are glad to note this progressive spirit of our neighbors, who have an excellent Club, which has hitherto possessed but poor accommodation for matches, which, be the weather good or bad, had to be played on open rinks.

Further notice in due time of the grand reception to be given our distinguished Christmas visitor.

REVIVAL SERVICES.—Mr. J. Bennett Anderson, English Evangelist, who has labored in England, and more lately in Canada, will conduct special religious services in the Lecture room of the Bridge Street Methodist Church every evening this week, except Saturday.

In addition to being a good speaker, Mr. Anderson is represented as being a good singer, and, having taken part in the Moody and Sankey movement in England, he has a large number of the most popular revival melodies at his command. Services at half-past seven. All are invited.

WINTER.—The first genuine winter weather arrived yesterday. Snow began to fall early in the morning, and continued to descend during the greater part of the day, and by night the earth was wrapped in a white covering of about three inches in depth. The snow had drifted a good deal, and sleighing was at a good pace, yet the tinkle of the sleigh bells was heard occasionally, giving tone that some one was out enjoying the first of the sleighing in spite of the driving storm. Last year it was about a week later when the first

heavy snow fall took place. This morning the snow still covered the ground, but it does not seem likely that it will remain for many days.

THE "OVERSEA" DELEGATE.—This new steamer is expected to arrive here to-morrow. She has been detained at Port Dalrymple by the stormy weather.

THE FIFTH NOVEMBER AT THUNDERBOLT.—A correspondent writes to the Times, Feb. 26, being the 27th anniversary of the Gunpowder Plot and the 17th of the landing of the Prince of Orange on British soil, and the 21st of the Battle of Tolbooth was duly celebrated at Thunderbolt by T. LET THERE BE HARMONY IN THINGS ESSENTIAL—LIBERALITY IN THINGS NOT ESSENTIAL—CHARITY IN ALL.

NO. 170.

Loyalty of the Grits.

A Scorching Review of the Premier's Sarnia Speech.

mier's Sarnia Speech.
(From the London Standard, Oct. 29th.)
A very prominent place in the latest batch of Canadian newspapers is given to a speech made by Mr. Mackenzie, the Premier to his constituents at Sarnia.

those who have paid any attention to the process of building up a Liberal party in the Dominion during the last two years will be not a little interested in following the Canadian Premier in this expedition to the local divisions. Putting out of sight provincial questions, the great test of the Dominion, it must be candidly said, has been high time we should understand what is a Canadian Liberal's idea of his duty towards the Empire. If there has been any doubt or wavering on this point—Mr. Mackenzie himself has been the object of any suspicions which he considers just—if the Liberal party in Canada been misunderstood—it is principally due to the equivocal acts of the members

that Germant and the distasteful speeches and confused opinions of its supporters. We find, for instance, in one of the recent Canadian Journals a declaration of Liberal members, taken from local *Parliamentary Companion* of the year, which describes some of them as in favor of "British connection," while others are "advocates of Canadian independence" — some of them are down as Freetraders, others as Protectionists. Even among the Ministers high officials who have been appointed the Ministry we perceive there are gentlemen who have distinguished themselves by their public declarations in favor of the

their pure dedications in favor of the independence of Canada. If we examine some of the principal measures which have been identified with Mr. Mackenzie, we shall find them to consist in the reversal of the Imperial policy of his predecessor; an attempt to make a separate treaty with the United States, to the prejudice of Great Britain; an endeavor to violate the terms of the Confederation to the prejudice of one of its younger members; a Supreme Court Act, aimed at depriving British subjects in Canada of their most sacred rights, and the Ir-

Crown of one of its essential Imperial
negatives, and generally a disposition
towards the protection of the interests
of purely Canadian provincial or local
interests. It is true that nearly

we fail to reconcile Mr. Mackenzie's

to the cause of the Empire. Mr. Mack-
enzie speaks very obscenely of these things

some provisions of that treaty to be interpreted as a declaration of war, and that the terms of one of those provisions in any way were prejudicial to British and Canadian interests. Considering that there is sent a joint commission sitting into some of those provisions, and that the Canadian Prime Minister, Mr. Mackenzie, is object to discussing any of the claims on the ground that they are prejudicial because he himself had a light of them in his own attempt to propose to throw in the towel under the reciprocity treaty with the United States as a result of the fisheries as a bait to tempt the United States to enter into a reciprocity treaty. That could not have been the case, because the United States and them of any great value to the United States. It is a light of these claims very fine they are under discussion, and that the United States is a piece of unwisdom.

[illegible]

Britain being magnanimously allowed credit of her "technical" responsibility on these terms Mr. Mackenzie compared to be loyal to the British cause keeping up the "closest possible relations with Britain," while reserving to himself the right to act for himself in all their relations to the United States relations which "do not concern action of the British people"—having h

BANK STATEMENTS.

From the Bank returns just published in the *Official Gazette*, it will be seen that at this time the country shows a deficit in the act of this profusely "pure government" and put a stop to the present system of "casual advances," which are being extended to certain banks that render them important political aid in times of need, by subscribing liberally when a "big push" had to be made. By reference to these statements it will be seen that in the month of October last the government was indebted to the Ontario Bank, of which Sir James Simpson is President, the sum of \$209,391.67, bearing interest, and allowed the same little sum of \$209,391.67 to remain in the same bank without drawing on it for interest. A very substantial way of paying for political support in Parliament and out of it. The question is, would any business man so unwise an act, and why should the Government be allowed to do it at the expense of the tax-payers of the country, especially when we are paying over \$6,000,000 yearly for interest on Public Debt?

Looking a little further it will be found that from the Ontario Bank \$200,000 was drawn last month bearing interest, and nearly \$1,500,000 left in the same bank without interest. Well might this same bank pay 16 cents to its stockholders the past year, and propose to pay 7 per cent on the present half year, although trade is seriously depressed and merchants, manufacturers and others unable to make ends meet!

We require another Finance Minister like Sir Francis Hincks to look after these things and not allow the tax-payers to be plundered in and out of Parliament, and the present Finance Minister fears to measure swords with them, consequently the country will necessarily suffer while this weak man remains at the head of the Finance Department.

At the present time there is another monstrous grievance in the want of small bills. If change for a 25 cent bill is not given, one must walk from shop to shop until he is tired before he can get it, because the banks will not give them out, as they make no profit on the circulation. This is a great inconvenience to tradesmen and others, and necessary and embarrassing, and should be remedied immediately by the Government taking steps to see that the small bills are put in circulation and the people benefited and the revenue improved thereby.

The Eastern Question.

The London *Times* of the 19th inst., in a leader discusses the question of the Turkish insurrection. It says that the Sultan cannot save Herzegovina, as it is farly out of his grasp as if destiny had settled it by a conference between the Powers. Peace can be brought about only by the extinction of Turkish authority, but if the disturbed provinces were to be annexed to Austria, the Powers might take seriously a survey of the situation, and provide for the necessities of the future.

Cabinet Councils have been held in Downing street almost daily during the past week. Recently there have been indications of an early intervention in Turkish affairs, such as is foreboded in the leading article of the *Times* of the 19th inst., an extract of which is given above according to an arrangement of the Powers that participated in the Treaty of Paris.

A special to the *Pull Mail Gazette* from Berlin says that negotiations are now progressing with the Great Powers relative to the Turkish difficulty, based on the understanding of the preservation of the status quo in regard to Turkey. The *Sphinx* writes that the Foreign Powers of the impending issue of a circular detailing the reforms it proposes, and stating the guarantees offered for their execution. The *Morning Post* publishes a report that the Turkish ambassador at St. Petersburg has been suddenly summoned to Constantinople.

I. O. O. F.—The Grand Lodge of this Order will hold its annual session at Quebec, commencing on Tuesday next.

TORONTO LUNATIC ASYLUM.—It is said that Dr. Clark of Princeton has been appointed superintendent of the Toronto Lunatic Asylum.

MONTREAL CENTER.—The Montreal Star of last evening says: "It has been decided by the Liberal Conservative party not to oppose Mr. B. Devin in Montreal Centre, so that the learned gentleman will have a walk over."

REMEMBER CARRIAGE CHANGES.—A Toronto report says: "It is understood that the session closes, provision will be made for the reconstruction of the Educational Department. Dr. Ryerson will retire on a pension of \$2,000. Mr. Crooks will be Minister of Education. Mr. S. G. Wood, Treasurer, and the vacant portfolio will be tendered to Mr. Thomas Hodgins."

CONFIDENTIAL CRIME.—It seems the detectives have obtained a clue to the perpetrators of the robberies at Ganouque and of Morgan Bros., Montreal. The burglars are in the United States, and the story says the thieves offer to restore the silks, which are said still to be in Canada, and valued at \$14,000, on a payment of \$2,000. The Mr. Morgan has offered to pay the money offered to deliver up to Mr. Street of Ganouque his property for \$2,000, and has decided to pay the money.

A Desperate Cause and its Desperate

The Gifts are endeavoring to establish a new principle in political law, viz.: That a member of the legislature who is unseated for corrupt practices, and even disqualified for personal bribery, who appeals against the decision of the judge who tried the case, may, pending such appeal, take his seat in the House as though no judgment had been given against him. This doctrine, however, arbitrary and unjust to every honest person who has been unseated to reverence the law, and to respect the decision of the Courts, is quite in keeping with the policy which has marked their whole political career, both when in opposition, and since Canada's civil genius, by means of a conspiracy of letter-carriers, secretaries, clerks, confidence men, and political rascals, committed to their hands the purse and the destinies of the Country.

The Election law, which they fondly thought was to maintain them in their seats for ever, has made at once a thorough exposure of their hypocrisy and so extensive a slaughter of their corrupt supporters, that their cause is becoming desperate. These desperate remedies, they are prepared to go any lengths to retain their hold of office, with its powers and emoluments; and it is almost certain that they will attempt to force this monstrous proposal, both in the Local and Dominion Legislatures, and it is equally certain that they will find an equivocal Premier, like Mackenzie, a shuffling "Christian politician" like Mr. Blair, an insouciant cabinet like Blake, to sustain the outrageous proposal, and a dishonest newspaper like the *Globe* to justify this and all their enormities; while it is quite likely that the corrupt and scheming Government, by any court of competent jurisdiction, to have been improperly elected, is deprived by the sentence of such court of his standing as a Member, and his appeal to the Superior Court is virtually an application for reinstatement; but until the judgment of the Superior Court is reversed, he is under the disabilities implied in the first judgment. Were it otherwise, every unseated and disqualified member, by the simple act of appealing, might retain his seat during one session, and perhaps by some legal quibble involving delay, might sit, although properly disqualified, during a whole Parliamentary term—and this, although he might never intend to carry his appeal to judgment.

TERRELL RAILWAY ACCIDENT.—The N. Y. Herald special cablegraph from Copenhagen says that a melancholy disaster has occurred on the railway running between Stockholm and Malmo. Sixty persons were completely smothered. Sixty persons were killed or severely injured.

THE CANAL.—The Montreal Star of last evening says: "The ice in the canal has become so strong that navigation is practically stopped. Nearly 20 boats were yesterday forced to lay up in the Champlain Canal, being unable to get through. Unless an early thaw occurs, the season will be no more than a costly traffic this season."

WRECK.—The captain of the schooner Laura reports having passed through a portion of the wreck of a large vessel off Goderich yesterday morning, the 19th inst. The top of the cabin and portions of the deck and bulwarks, water-cask, boom, and other articles were floating around, all indicating that some large vessel had recently foundered. The yawl of the schooner John B. Merrill, of Milwaukee, drifted about six miles south on Wednesday morning.

THE REVIVAL MOVEMENT.—The *Christian Guardian* solemnly says in regard to the extraordinary amount of money which Messrs Moody and Sankey: "We believe that Moody and Sankey are good and true men, bearing a faithful testimony for the truth of God, though we do not accept Mr. Moody's Calvinism. But we believe that the prevailing faith in the necessity of getting Moody, in order to have a revival, is dishonoring to God. It has too much of the appearance of trusting in man. Mr. Moody has no new Gospel to preach; no new way of salvation to unfold. The Lord is not dependent on any man as an instrument. He will honor those who honor Him. That people should have more faith in the agency of Mr. Moody, than in the power of the Word and Spirit of God, is not a healthy state of things."

STEARNS' ACCIDENT.—A Pembroke telegram of the 19th inst. says: "During the storm last evening, and shortly after leaving Petawawa, the steamer 'John Edgar,' which was going through the Narrows, struck a rock, causing a small hole. When about four miles from Pembroke the snow and storm were so blinding that it was thought advisable to beach her, otherwise the pumping would not have kept her afloat. She now lies with one human in the water in her. Some of the passengers came to town in small boats; eight or nine others remained on the steamer all night. The 'Pippin' has taken her relief. The latter was very rough and dark. The steamer 'O. O'Kelly' has started on the usual trip to Deschambault."

THE SPANISH QUESTION.—Respecting the letter of Don Carlos to Alfonso, King of Spain, promising his assistance in maintaining the Spanish throne against all comers, and especially against the United States, the English papers have the following comments: "A special from London says: 'Don Carlos' letter to King Alfonso on the Cuban question, is ridiculous. The *Daily News* editorially says, the letter shows the weakness of the Spanish character. The *Telegraph* says it is impossible to take so serious an interest in the fate of the *Pull Mail Gazette* says, the letter is a desire to find an excuse to retire from the weary conflict of the Spanish throne. The Committee in London has no funds. Don Carlos is regarded by his friends in London as folly."

Countess went into Committee on Ways and Means. Mr. Wood moved, seconded by Mr. Ash.

County Council.

SECOND DAY.

FRIDAY, NOV. 19.

Committee met at 10 o'clock a.m.

The minutes of yesterday's proceedings were read and approved.

GRAVEL PIT.

Mr. Graham asked the purchase of a gravel pit from Mr. Jeremiah Smith, at Thompson's Bay, for use as a gravel pit for the County.

Mr. Wood said that the gravel pit was in the pit, and how much was asked for it.

Mr. Graham replied that he was not a man, and Mr. Wood would take \$150 for it.

Mr. Wood said \$150 represented 3,000 yards of gravel, and it was a question whether they would get that much gravel out of it.

Mr. White supported the proposed purchase.

Mr. Flint said a good deal of gravel had been taken from that neighborhood, however, they ought to make the purchase, which he considered would be cheap at the rate named.

Mr. Graham said that the pit was the only one in that neighborhood, and could be worked to a depth of thirty feet.

Mr. White stated that the gravel said to have been sold had been sold for other persons.

Mr. Wood moved that the County road be ordered by the Pathmaster.

Mr. Flint thought that the fencing of the pit would prevent further traffic.

Mr. Graham said that the gravel pit was in the County road, and that the gravel was sold for other persons.

Daily Intelligence.

MONDAY, NOVEMBER 22, 1875.

Town and Vicinity.

The Christmas visitor is coming.

TEACHERS' ASSOCIATION.—A meeting of the South Hastings Teachers' Association was held on Saturday afternoon.

ICE.—The ice in the Niagara river on Thursday morning was so heavy that the steamer Shannon was unable to force her way through.

Look out for the Christmas visitor.

SALE OF LOTS IN TROTTON.—The great sale of the Trotton lots in Trotton, held on Wednesday, the 24th of November, instead of the 26th, as previously advertised. See corrected advertisement.

LECTURE AND GRAND YESTER.—Right Reverend Bishop O'Brien, of Kingston, is to lecture and conduct grand vespers in St. Michael's Church to-morrow evening. Vespers will begin at 7 o'clock sharp. The subject of the lecture is "The Catholic Church."

What is the Christmas visitor?

BEAVERVILLE CUBSING CLUB.—A fall meeting is requested of the members of the Club at Hanby's at 8 o'clock this evening to decide upon which Branch of the Royal Caledonian Curling Club in Canada, this Club shall unite with, whether with the Ontario or the Quebec Branch. A fall attendance is requested.

HOW LAKE BEIGER.—The County Survey advertisement for tenders for the construction of a bridge across the lake at the site of the present bridge, on terms and conditions which can be learned from the advertisement. Persons who have timber suitable for bridging purposes for sale, will obtain a customer by applying to Mr. Francis at Hudson.

Is it a spirit or human form? The Christmas visitor.

ACCIDENT.—On Saturday night John McCarry, driver of the chariot of Bullen & Lake, and with other passengers, was driving along Charles Street, when one of the front wheels of the vehicle which he drove struck a tree stump, throwing him with considerable violence to the ground, where he struck his head. McCarry was picked up immediately. He was badly hurt, but it is thought that no bones were broken. This stump on a previous occasion very nearly caused an accident, the driver of Bullen & Lake's omnibus stating that one night recently he was nearly thrown from his box, by driving over this same obstruction, which ought at once to be removed.

Coming! Coming! Coming! Who? The Christmas visitor.

SCHOLARSHIPS.—A number of the members of the Town Council, and other gentlemen upon the advice of Mr. A. Pardee, who has been in town for a couple of days, at the office of the North Hastings Railway Co. on Friday night, had a long and interesting interview with that gentleman upon the advisability of commencing the works proposed to be constructed in town, for the purpose of smelting ores. The gentleman expressed his willingness to commence at once, provided he could receive an assurance the bonds that had been voted would be forthcoming. However, as it was, if he could see his way clear, he would commence to quarry stone this winter, but could make no positive promise.

NOT TO BE OPEN ON SUNDAY.—A portion of the press has asserted—that what authority we know not—that the "Centennial Exposition of next year is to be kept open on Sundays." Considerable criticism has been made upon this assumed intention. As a matter of fact, however, it has never been contemplated to open the building, and the preliminary regulations of the exhibition, published on Friday 19th, 1875, provided that "it will be open to the public daily, except on Sundays." This was embodied in the report submitted to Congress on February 26th, 1874. Gen. Hawley has recently written a letter stating that there was not the slightest intention of keeping the halls open on Sunday, and that if there were he should resign.

THE GROWTH OF CHEESE PRODUCTION.—A writer in Harper's Magazine gives some very interesting and curious facts in relation to the growth of American cheese production. In 1860, the aggregate value of the butter and cheese exported from the United States amounted to only 234,000 dollars. About this time a farmer in Onondaga County, New York, named John C. Smith, organized the cheese factory system, and his success was so great that farmers in other sections of the State began to follow his example. The system has developed so rapidly that there are now cheese factories in New York alone, and in the entire country about ten times that number. As a result the exports of cheese

in 1861 amounted to \$3,224,031, and continued to increase until in 1874 they reached \$22,000,000, and in 1875 the figures will be larger still. For 1874, the exports of cheese from the port of New York amounted to \$6,340,000, and Canada in the same year exported 20,000,000 pounds.

PORK.—Dressed hogs are 60c per 100 lbs. to 65c. Heavy pork hams 67.50 and light 67.

Further notice in due time of the grand reception to be given our distinguished Christmas visitor.

LADY U.—The *Perle* is the last of the yachts to go into winter quarters. She has been stripped, and is moored on the east side of the Grand Junction wharf.

REPORT OF SHERR.—The steamer *Rock* took this morning as part of her cargo one hundred sheep, which will be forwarded from Kingston to the United States markets.

STOPEK RUSKIN.—It is thought that the steamer *Ruskin* has stopped running for the season and laid up at Pictou, as it did not make her usual trip this morning.

SEATING.—The boys had splendid skating on the river and along the shore of the Bay, where the water is shallow, the ice being of a nice thickness and as smooth as a sheet of glass.

THE GRAIN MARKET.—There are a few reports of grain to-day.

ALMAKOPE 1875.—Those who have contracted for space in the *Intelligencer's* family Almanac for 1876, are requested to send in their advertisements at once, as it is desirable that the work should be put in circulation at an early day.

POWELL'S.—Attention is directed to the advertisement of Mr. Wm. Powell's literary and boarding stable, who are located near the upper bridge. Good horses and rigs are furnished at reasonable rates, and liberal terms are offered to those who wish to leave on Saturday to spend Sunday in the country. Other particulars, general interest will be found in the advertisement.

FIRE IN RANTON.—On Sunday morning, between 1 and 2 o'clock, the barns and sheds belonging to Mr. Wm. Frost, of the 13th concession of Rawdon, lot 16, were discovered to be on fire, and before assistance could be rendered, the buildings, together with a large quantity of grain, hay and farming implements, together with three valuable horses and two head of cattle. Mr. Frost's loss is heavy. The fire is supposed to be the work of an incendiary, and cannot be accounted for in any other way. Insured in the Hastings Mutual for \$10,000.

NAVIGATION.—Last night's severe frost almost closed the Bay, which was covered over nearly the whole of its surface with ice half an inch thick. The steamers managed with some little difficulty, to break their way through the *Pictou* having started on her last trip to Montreal last night, and the *Becker* left for Kingston on about 5 o'clock this morning. The *Ulton* was on time this morning, finding no difficulty in making a passage into the harbor and again the ferry steamer *Price Edward* made her trip today, but should there be another heavy frost to-night she will have considerable difficulty in running to-morrow. The schooners in port are preparing to lie up for the winter, some of them having been engaged for the season. It is anticipated that the permanent closing of navigation for the season will take place for ten days yet, the average time of closing being about the 2nd of December.

SCHOLARSHIPS.—The Queen's College Journal is speaking of scholarships, marks that Mr. D. J. Napone, is likely to be the last to enjoy the benefits of the Campbell scholarship, one of the best, its value being \$80. The Journal adds: "The executors of the late Alexander Campbell, minister at Stirling, Ont., have paid to the College Treasurer the sum of \$3,000, in accordance with Mr. Bachan's will, to be applied by the Trustees in assisting young men studying at the said institution for the ministry of the Presbyterian Church in acquiring their education and fitting them for the ministry. The scholarship in Arts shall be of the value of \$100, that it shall be awarded at the close of next succeeding sessions on a competitive examination and that the scholar, residing in theology will be of the value of \$80 and is to be completed for the matriculation examination in theology, the first competition to take place in 1876."

Town and Vicinity.

The Christmas visitor is coming.

Town Council.—A regular meeting of the Town Council is appointed to be held to-night.

Hot Day.—There is still open water to be seen in the Bay, though navigation is officially closed for the season.

What is the Christmas visitor?

McGREGOR CLUB.—This popular scientific organization will hold a meeting this evening in the Shiro Hall.

Prize Court.—There were no prisoners for trial this morning, and no one being sent down for hearing to-day, there was no business in Court.

NEW CARROLL FACTORY.—It will be seen by advertisement that Mr. John Finnegan has opened a new carriage factory on Mill Street, opposite Burrows's factory.

THE MARKET.—The weather and the roads were too much for buyers and sellers this morning, business being the lightest of the year. No grain was received to-day.

THE CELLS.—There were six persons in the cells on Saturday night—five for prisoners and one for a mad man.

Look out for the Christmas visitor.

SEISMOLOGY.—There were a few slight shocks this morning, and the wind, being falling heavy most of the day, the wind being easterly and the air being light and raw.

STREET.—Yesterday was one of the most disagreeable days of the season, snow falling heavy most of the day, the wind being easterly and the air being light and raw.

Is it a spirit or human form? The Christmas visitor.

THE LATE JAMES QUINN.—The members of De Wolf House Co. No. 7, of Oswego, have forwarded to Mrs. H. W. No. 1, of this town, a fine photograph, neatly framed, of the late James Quinn, a member of both Companies. The gift is highly appreciated by the recipients, and the beautiful portrait will be hung in their hall as a remembrance of their lamented comrade.

ST. ANDREW'S DAY.—To-morrow will occur the Anniversary of St. Andrew, the patron saint of Scotland, which the St. Andrew's Society of the County of Hastings will celebrate in the usual manner.

At 1:30 p. m. the procession will be formed at Nelson's Hall and will proceed to St. Andrew's Church, where a sermon will be preached at 2 p. m. by the Rev. Mr. W. McLean, one of the Society's Chaplains. The annual dinner will be held at the Dufur House, and the usual "good time" will no doubt be enjoyed.

Coming! Coming! Coming! The Christmas visitor.

ATTEMPTED SUICIDE.—On Saturday night a man named James Graham, a resident of the fort, attempted to commit suicide by cutting his throat with a knife. He partially succeeded, having severed the skin in his attempt, but the knife was too dull to penetrate the flesh, and he was taken to the hospital, where he is now recovering.

Paris, Pa., Nov. 28.—The steam-barge *Ole* during the storm on Friday last, struck the western end of the pier at the entrance of the harbor, completely demolishing the building, and killing a man.

A temporary light will be exhibited until the less damaged part can be replaced.

PHILADELPHIA, E. I., Nov. 28.—In Cranston, on Saturday evening William Manning and his son-in-law, quarrelled with a stranger, and Manning was killed.

When young Manning ran upstairs, whether his uncle followed him to endeavor to soothe him or to kill him, is not known.

As he reached the head of the stairs, assisted by the servant girl, Manning, supposing in the darkness it to be his uncle, fired at him with a horse-pistol, killing him.

A part of the charge wounded the servant girl slightly, the remainder lodged in his mother's groin, inflicting a mortal wound.

Manning then attempted to flee, but was seized by the police.

NEW YORK, Nov. 28.—Drapery from Wilkes-Barre, Pa., being details of the most extensive and serious mining casualty ever known in the Wyoming Valley, and seen all the way from the Atlantic to the Pacific.
